

GARDEN CLUB DAFFODIL PROJECT

This fall, the Garden Club is embarking on a three year project of planting and naturalizing daffodils in

CARLTON

Rockport. Our goal is to enhance the beauty of Rockport with a lovely display of daffodils each spring in our town gardens, home gardens, and at selected sites around town. To begin, we have ordered four thousand daffodil bulbs. Two thousand five hundred will be planted at selected sites and five hundred in town gardens. We have reserved one thousand bulbs for our members to purchase (at cost) for their

home use. The daffodil plantings will continue in 2011 and again in 2012.

The project has been fully funded for all three years and will provide a welcoming display of spring color in Rockport for all to enjoy for years to come as the bulbs naturalize.
